## READING

### GREAT GYMNASTS

Gymnastics is a popular sport worldwide and there have been some incredible gymnasts over the last 30 years.

#### Simone Biles

American gymnast Simone Biles took up the sport at the age of six and so far she has won 30 Olympic and World Championship medals, more than any other American gymnast. She stands out due to her hard work and determination to succeed, as well as for being good at all the different events in gymnastics (floor exercise, bars, beam and vault). She is particularly famous for doing extremely challenging moves, ones most other gymnasts don't attempt, especially not in competitions. She even has a move named after her, 'the Biles'. Simone also loves dance and in 2017 she was in the TV series *Dancing with the Stars*. Although her performances impressed the judges, she ended up in fourth place.

#### Svetlana Khorkina

Most people would agree that the Russian gymnast Svetlana Khorkina was the best gymnast in the world during the 1990s and early 2000s. Because she was unusually tall for a gymnast, she had to create new moves to suit her height and strength. Svetlana holds the record for having more moves named after her than any other male or female gymnast, eight in total. In 2004, she retired after winning an incredible 47 Olympic, World and European Championship medals. She worked on Russian TV as a commentator on the gymnastics events during the Beijing Olympics. She has also got into writing and is the author of two books.

#### Gina Gogean

Gina Gogean is a gymnast from Romania who won her first international medal in a competition in Japan in 1989 at the age of 12. During her career, she won 30 medals at Olympic Games and other championships, and was a member and later leader of the national Olympic team. She was the favourite to win golds at the Atlanta Olympics in 1996, but she had to have an operation just five weeks before. Despite this, she surprised everyone by still competing and winning four medals. After retiring in 1998, she trained gymnasts in Romania and in Scotland. She has been a competition judge since 2001.

#### **Sports in Our Lives**

Nowadays, sports play an important role in teenagers' lives. Among many kinds of sports, I enjoy playing badminton the most because it is interesting and suitable for my health.

I usually play badminton in the school yard after classes or at a sports center near my house at weekends. Sometimes, I practise with my classmates, and sometimes with my family. Playing badminton helps me relax after stressful lessons and forget about homework for a while.

This sport is very good for teenagers' health. When I play, I have to move quickly, run, and use my arms and legs a lot. As a result, my body becomes stronger and more flexible. In addition, badminton helps me make more friends. We often share skills, encourage each other, and have fun together, so our friendship becomes closer.

I would strongly recommend badminton to other young people. It is easy to learn, does not need expensive equipment, and can be played almost anywhere. More importantly, it helps teenagers stay active, confident, and happy in their daily lives

#### **Is Technology Changing the Way Teenagers Communicate?**

Nowadays, many people believe that technology is changing the way teenagers communicate. With smartphones, social media, and online platforms, young people have more choices to contact others. However, some people think that technology has not changed communication very much. On the one hand, some people agree that technology is changing teenagers' communication. In the past, teenagers mainly talked face to face or by phone. Now, they often use messages, video calls, and social networks. They can communicate faster and with more people at the same time. For example, students can chat in group messages to discuss homework or share ideas easily.

On the other hand, others believe that technology does not really change the way teenagers communicate. Although the tools are different, the purpose is still the same: to share feelings,

ideas, and information. Teenagers still want to make friends, talk about their problems, and support each other, just like before. They also still enjoy meeting and talking in real life. In my opinion, technology has changed the way teenagers communicate, but it has not changed the meaning of communication. It makes communication faster and more convenient, but real relationships are still important. Therefore, teenagers should use technology wisely and keep good face-to-face communication.
